Comprehensive Curriculum

Offer courses that engage your students in meaningful ways and improve their educational experience within your school program. Our courses allow students to find their passion, hone their skills, engage socially and intellectually, and achieve academic excellence.

Personal Curriculum Narratives

Engaging curriculum narratives employ backwards design methodology to support best practices on how today's students learn.

Reflective Discussion Assignments

High-interest discussion questions encourage students to reflect, collaborate, and share learning experiences.

Captivating Course Lab Activities

The principals of Bloom's Taxonomy are applied to labs and activities as students evaluate, create, and analyze.

Contemporary Graphics

Next generation graphics and thought-provoking instructional design that is expected by today's online student.

Optional Support Tool Bar

Support students diverse needs with over 90 language translations, text-to-speech read aloud, dictionary tool, screen masking, and more!

Balanced Reading Level

Courses consist of an interesting and balanced reading level. Bold text helps students identify main ideas, keywords, and concepts.

Interactive Features

Flashcards, slideshows, diagrams and other elements engage students with the content and decrease passive learning.

Formative & Summative Assessments

Courses contain auto-graded unit quizzes, midterm exams, and final exams. Students also have opportunities to "test their knowledge" before quizzes.

Podcast Narrations

Each course unit contains professional audio narrations to provide support for auditory learners. Students can also listen on-the-go to make the most of their time and take learning deeper.

Videos

Short videos offer closed captioning and engaging content.

How Our Courses Are Offered

OPTION

1

Courses can be delivered through your school's learning management system. eDynamic Learning courses are 100% compatible with the most popular learning management systems used in K12 education.

OPTION

2

Our courses can be hosted on our robust eDynamic Learning management system. Based on school colors and logo, the learning management system is custom branded for your school.

eDynamic Learning Announces Our Newest Solution

Career-Based Simulations from Knowledge Matters.

Knowledge Matters experiential career-based simulations allow students to develop real-world skills in a digital environment. Students go “hands-on” and make a variety of choices and decisions, get to witness the impact of those choices in real time, and then improve and refine their processes. They’ll experience scenarios such as staffing, pricing, safety, and more in industries such as food service, fashion, hospitality, retailing, sports management, manufacturing, marketing, and financial literacy. The simulations align to many of the courses offered by eDynamic Learning, creating a complementary combination of rich content for teaching and learning.

Entrepreneurship

From the elevator pitch, to securing financing, to operating a profitable business, this sim teaches all the keys to successful entrepreneurship.

Restaurant

Starting your own restaurant is a common dream. Here students do it in the safety of a virtual world while learning general business concepts.

Personal Finance

Live out ten financial lifetimes in an hour! From banking, to credit, to investment - this is the #1 personal finance curriculum in the U.S.

Accounting

From debits and credits to forensic accounting, the subject comes to life when students learn through a business they run.

Fashion

Developed with the Fashion Institute of Design & Merchandising this sim covers trend spotting, to design, to mark-ups and mark-downs!

Sports & Entertainment

Your students will learn business and marketing in a context that is sure to attract them to class - the exciting world of sports and entertainment.

Retailing

In focused lessons, students control pricing, staffing, products and more. In the capstone project, they run the whole show.

Hotel

Developed with Marriott International, this sim gives students a realistic look at the inside workings of the global hospitality business.

Management

Students will manage a manufacturing plant. They’ll recruit employees, supervise them, and even fire them if needed.

Knowledge Matters career-based simulations are used in over one-third of all U.S. high schools and thousands of students participate in simulation competitions through DECA, FBLA, FCCLA, and BPA.
